Tips to Help You Save on Your Energy Bills

DIY Energy Conservation Tips

Conserving energy is an important measure to consider and something we can all do to help reduce our home energy bills!

- If you conserve and use less energy you can save. For Example
- If you close vents in unused rooms around your house...you can save up to \$100 a year
- If you clean your clothes dryer lint filter every time you use it...you can save up to \$66 a year
- If you take showers instead of baths...you can save up to \$28 a year
- If you keep your thermostat set at 65- 68 degrees in the winter months and between 76-78 degrees during the summer...you can save up to \$85 a year
- If you replace just 5 lights in your home that you use most often with LEDs...you could save about \$45 a year
